

# Diamond Coated Rotary Cutting Wheels

Precision diamond cutting wheels are designed for fine detail work. Each wheel features a durable diamond-coated edge for extended life and efficient material removal.

## Product Overview

### High-Precision Diamond Cutting Wheels

These precision-engineered diamond coated rotary cutting wheels are designed for fine detail work across a diverse range of hard materials. Ideal for stone, glass, ceramics, and hardened metals, they offer excellent material removal rates and superior longevity. Each wheel is optimized for accuracy, ensuring professional results during cutting, shaping, and grinding tasks.

## Technical Specifications

### Key Features

- Durable diamond-coated edge
- Includes attachment mandrel
- High precision for fine detail work
- Extended tool life

### Primary Applications

Cutting • Shaping • Grinding

### Compatible Materials

Stone, Glass, Ceramics, Hardened Metals
