Product Overview

Professional Diamond Core Drill Bit

This diamond core drill bit is engineered for high-performance dry cutting across a wide range of masonry and construction materials. Designed to deliver precise and clean holes, it is an essential tool for professionals working with concrete, brick, asphalt, and stone. The inclusion of side slots facilitates efficient core removal, ensuring consistent performance and durability during demanding drilling tasks.

Applications

Compatible Materials

Concrete, Brick, Paving, Slabs, Asphalt, Limestone, Clay Bricks, Aerated Block, Tile, Glass, Ceramic, Porcelain, Granite, Marble

Technical Features

Cutting Method

Dry Cutting

Design Features

- Diamond-coated cutting edge for extended tool life
- Side slots for easy core/slug removal
- Improved cooling capability
- Compatible with arbor and guide drill systems
- Threaded connection for drill adaptors and extensions
