

Diamond Core Drill Bit

This diamond core drill bit is designed for precision drilling in hard materials, including ceramic, porcelain, granite, and marble. It features a durable steel body and a diamond-impregnated cutting edge for efficient material removal.

Overview

High-Precision Diamond Core Drill Bit

This diamond core drill bit is engineered for precision drilling in demanding materials, including ceramic, porcelain, granite, and marble. It features a durable steel body paired with a diamond-impregnated cutting edge, ensuring efficient material removal and extended tool life. Designed for versatility, this bit performs reliably in both wet and dry drilling applications, delivering clean, accurate holes with minimal chipping.

Technical Specifications

Drilling Application

Wet • Dry

Compatible Materials

Ceramic, Porcelain, Granite, Marble

Model Identifier

ST0004

Construction

Body Material

Durable Steel

Cutting Edge Technology

Diamond-impregnated
