

# Diamond Core Drill Bit

Diamond core drill bits are designed for drilling clean, precise holes in hard materials. These bits have a diamond-coated cutting edge for efficient material removal and lasting performance.

## Product Overview

### Professional Diamond Core Drill Bit

Designed for precision and efficiency, these diamond-coated core drill bits provide clean, chip-free drilling results in the toughest materials. They are engineered for compatibility with standard drill tools, making them a versatile choice for construction, renovation, and professional DIY tasks. Their robust design ensures long-lasting performance when cutting through hard surfaces like granite, marble, and porcelain.

## Technical Specifications

### Key Features

- Diamond-coated cutting edge
- High material removal efficiency
- Chip-free precision
- Compatible with standard drill chucks

### Primary Applications

Construction • Renovation • Professional DIY

### Suitable Materials

Tile, Glass, Ceramic, Porcelain, Granite, Marble, Stone
