Product Overview

Professional Diamond Core Drill Bit

This high-performance diamond core bit is engineered for drilling precise, clean holes in demanding materials including concrete, reinforced concrete, brick, tile, and stone. Featuring a durable cylindrical steel body with laser-welded diamond-impregnated segments, it ensures exceptional cutting efficiency and extended tool life. Designed for versatility, this bit supports both wet and dry drilling methods, making it an essential tool for professionals in construction, plumbing, HVAC, and electrical trades.

Technical Specifications

Compatible Materials

- Concrete
- Reinforced Concrete
- Brick
- Tile
- Stone

Construction Features

Laser-welded segments • Industrial-grade diamonds • Cylindrical steel body • Open slot design

Drilling Methods

Wet Drilling, Dry Drilling

Application & Usage

Target Industries

- Construction
- Plumbing
- Electrical
- HVAC

Compatible Equipment

- Rotary hammer drills
- Core drilling machines
