Product Overview

Professional Diamond Core Drill Bits

These professional-grade diamond core drill bits are engineered for high-precision drilling in demanding materials such as stone, granite, marble, ceramic, porcelain, and tile. Featuring high-quality diamond grit, they ensure efficient cutting performance and extended tool life. Designed for versatility, they include side slots to facilitate easy core removal and improved cooling during operation, making them a reliable choice for contractors and professionals.

Technical Specifications

Available Diameters

- 25mm
- 35mm
- 40mm

Tool Compatibility

Standard Drills • Core Drilling Machines

Compatible Materials

Stone, Granite, Marble, Ceramic, Porcelain, Tile

Features

Design Features

- High-quality diamond grit for efficient cutting
- Side slots for easy core removal
- Enhanced cooling design
