Product Overview

Professional Diamond Core Drill Bits

These professional-grade diamond core drill bits are engineered for high-precision drilling in challenging materials including stone, tile, ceramic, porcelain, granite, marble, and masonry. Featuring durable diamond-impregnated cutting edges and robust steel bodies, they ensure efficient material removal and extended tool life. Designed for versatility, these bits are compatible with standard drills and grinders, making them an essential solution for accurate hole creation in construction and renovation projects.

Technical Specifications

Available Diameters

- 25mm
- 35mm
- 40mm

Key Features

Diamond-impregnated edge • High-quality steel body • Core removal slots • Fast cutting

Compatible Materials

Stone, Tile, Ceramic, Porcelain, Granite, Marble, Masonry, Glass

Usage

Tool Compatibility

Standard drills and grinders
