Product Overview

Professional Diamond Core Drill Bit Set

This high-performance diamond core drill bit set is engineered for precision drilling in demanding construction environments. Designed for versatility, these bits are compatible with both wet and dry drilling applications across a wide range of hard materials, including granite, reinforced concrete, and brick. With robust construction and efficient debris removal features, this set is an essential tool for creating clean openings for pipes, cables, and ventilation systems.

Technical Specifications

Drilling Mode

Dry Drilling • Wet Drilling

Available Thread Types

- 1/2" BSP
- 1/4" UNC

Compatible Materials

Granite, Reinforced Concrete, Brick, Wall

Compatibility & Usage

Compatible Machines

- Angle grinder
- Portable engineering drill machine
- Drill machine with stand rig
- Rotary hammer drills
