Product Overview

Professional Diamond Core Drill Bit Set

This professional-grade diamond core drill bit set is engineered for high-performance drilling in concrete, reinforced concrete, brick, and various masonry materials. Featuring advanced turbo segments, these bits are designed to deliver faster cutting speeds and an extended service life for demanding construction, plumbing, and HVAC applications. The durable steel body construction ensures reliability and precision across a wide range of project requirements.

Technical Specifications

Segment Type

Turbo Segment

Available Sizes

Diameter (mm)	Length (mm)
100	150
108	500
120	450

Compatible Materials

Concrete, Reinforced Concrete, Brick, Masonry

Performance Features

Key Benefits

- Turbo segments for increased cutting speed
- Durable steel barrel construction
- Designed for professional construction and renovation use
- Optimized for longevity and precision
