

Diamond Core Drill Bit Set for Tile and Stone

This diamond core drill bit set is designed for drilling clean, precise holes in hard materials. It features diamond-coated cutting edges for efficient material removal and long-lasting performance.

Product Overview

Precision Diamond Core Drill Bit Set

This diamond core drill bit set is engineered for creating clean, precise holes in challenging, hard materials like tile, glass, ceramic, porcelain, and stone. Featuring a durable diamond-coated cutting edge, these bits ensure efficient material removal and long-lasting performance for professional applications. The set includes a variety of sizes to accommodate diverse hole diameter requirements, making it a versatile addition to any tool kit.

Technical Specifications

Usage Notes

- Requires water lubrication to prevent overheating
- Extends bit life through proper cooling
- Compatible with standard drills

Compatible Materials	Tile, Glass, Ceramic, Porcelain, Stone
Drilling Method	Diamond-coated cutting edge
Lubrication	Yes
