Product Overview

Professional Diamond Core Drill Bits

These diamond core drill bits are engineered for high-efficiency drilling in hard, brittle materials including porcelain tile, granite, marble, and ceramic. Featuring a quick-change hex shank, these bits offer seamless compatibility with standard power drills and impact drivers. Designed for both wet and dry applications, they provide a significantly longer lifespan compared to traditional electroplated tools while ensuring clean, precise hole formation.

Technical Specifications

Drilling Application

- Dry Drilling
- Wet Drilling

Compatible Materials

Porcelain Tile, Granite, Ceramic, Marble, Glass, Limestone, Slate, Fiberglass

Shank Type

Quick Change Hex Shank
