

Diamond Core Drill Bits

Diamond core drill bits are designed for drilling precise and clean holes in hard materials. The cylindrical steel body features diamond-impregnated cutting edges for efficient material removal and long-lasting performance.

Product Overview

Professional Diamond Core Bits

These segmented diamond core bits are engineered for both dry and wet drilling applications, providing versatility for various construction needs. Designed with diamond-impregnated cutting edges, they ensure efficient material removal and durability when working with hard surfaces like concrete and masonry. The robust cylindrical steel body construction supports precise hole drilling, making these bits an essential tool for professional core drilling machines and rotary drills.

Technical Specifications

Available Outer Diameters

Inches	Metric (mm)
1"	25
1-1/8"	28
1-1/5"	30
1-1/4"	32
1-1/2"	37
1-3/5"	40
1-4/5"	45
2"	52
2-3/8"	60
2-3/5"	65
2-4/5"	72
3"	78

Available Lengths

- 6"
- 8"
- 10"
- 14"
- 16"
- 18"
- 150mm
- 200mm
- 250mm
- 350mm
- 400mm
- 500mm

Drilling Compatibility

Dry Drilling, Wet Drilling
