

Diamond Cutting Blade for Hard Materials

This diamond cutting blade is designed for cutting hard materials such as stone, concrete, or tile. It features a segmented rim for efficient material removal and cooling.

Product Overview

Professional Diamond Cutting Performance

This diamond cutting blade is engineered specifically for demanding tasks involving hard materials, including stone, concrete, and tile. Its robust construction utilizes high-quality diamond grit to ensure superior durability and precision during operation. The design incorporates a segmented rim to facilitate efficient material removal and maintain optimal cooling during intensive use.

Technical Specifications

Rim Design	Segmented
Suitable Materials	Stone, Concrete, Tile

Manufacturing

Origin
Made in China
