

Diamond Cutting Segments

Diamond cutting segments are engineered for cutting hard materials. They feature durable construction with precisely embedded diamond particles for efficient cutting.

Product Overview

High-Performance Diamond Cutting Segments

These premium diamond segments are engineered for professional-grade core drilling and cutting applications. Featuring precisely embedded diamond particles, they offer exceptional durability and consistent performance when processing tough, abrasive materials. Designed for efficiency, these segments ensure optimal cutting speeds and an extended lifespan in demanding industrial environments.

Technical Specifications

Primary Applications

- Core drilling
- Cutting
- Grinding

Compatible Materials

Concrete, Stone, Masonry

Performance Features

Performance Benefits

High Durability • Optimal Cutting Speed • Extended Lifespan
