

Diamond Cutting Wheel for Hard Materials

This diamond cutting wheel is designed for cutting hard materials such as tile, stone, and concrete. The wheel features a continuous rim with diamond particles for smooth and precise cuts, as well as a reinforced core for durability.

Product Overview

Professional Diamond Cutting Wheel

This high-performance diamond cutting wheel is engineered for precision cutting of hard materials, including tile, stone, and concrete. Featuring a continuous rim embedded with high-quality diamond particles, it delivers smooth, clean cuts while ensuring long-lasting durability. The reinforced core and specialized spiral design provide excellent stability and cooling, making it a reliable choice for both wet and dry cutting applications.

Technical Specifications

Operation Mode

Wet Cutting • Dry Cutting

Compatible Tools

- Angle Grinders
- Tile Saws

Suitable Materials

Tile, Stone, Concrete

Design Features

Core Features

- Reinforced core for durability
- Spiral design for cooling
- Continuous rim for precision
- Efficient debris removal
