

Diamond Grinding Cup Wheel

The diamond cup wheel is designed for grinding concrete, stone, and other hard materials. Its durable construction and diamond segments ensure efficient material removal for surface preparation, leveling, and coating removal.

Product Overview

Professional Grinding Performance

This diamond cup wheel is engineered for high-efficiency material removal on concrete, stone, and various hard surfaces. Its robust construction features premium diamond segments, ensuring consistent performance for surface preparation, leveling, and coating removal tasks. Designed for versatility, this tool delivers smooth grinding results suitable for both professional construction sites and demanding DIY projects.

Technical Specifications

User Suitability

Professional • DIY

Construction Features

- Durable construction
- High-efficiency diamond segments
- Engineered for consistent grinding

Suitable Applications

Concrete Grinding, Stone Leveling, Coating Removal, Surface Preparation
