Product Overview

Professional Diamond Grinding Solution

This diamond grinding cup wheel is engineered for aggressive material removal and surface preparation on concrete, stone, and masonry. Designed for use with angle grinders, it features a durable steel body with high-quality diamond segments that ensure fast, efficient grinding and a long service life. Its optimized segmented design facilitates superior dust removal and cooling, making it an ideal choice for leveling concrete floors, removing coatings, and preparing surfaces for polishing.

Technical Specifications

Grinding Mode

Wet Use • Dry Use

Available Segment Configurations

- Single segmented
- Double segmented
- Segmented turbo
- Triangle-separated
- T-shaped
- Arrow-shaped

Compatible Materials

Concrete, Medium Hard Granite, Brick, Masonry
