

Diamond Grinding Wheel

This professional-grade diamond grinding wheel is designed for concrete and stone surfaces. The segmented design ensures efficient material removal and optimal airflow for reduced heat buildup.

Product Overview

Professional Grade Diamond Grinding Wheel

This high-performance diamond grinding wheel is engineered specifically for demanding concrete and stone surface preparation. Featuring a strategic segmented design, it ensures efficient material removal while promoting optimal airflow to significantly reduce heat buildup during operation. Built for durability and consistent results, it is an essential tool for professionals in the construction and stone fabrication industries.

Technical Specifications

Compatible Machinery

- Angle Grinders
- Floor Grinding Machines

Suitable Materials

Concrete • Stone

Applications

Grinding, Polishing, Surface Preparation

Design Features

Key Features

- Segmented design for efficient material removal
- Optimized airflow for heat reduction
- Durable construction for long-lasting performance
