

Diamond Grinding Wheel

Diamond grinding wheels are designed for efficient material removal and surface preparation. The durable diamond matrix ensures extended life and consistent performance on concrete, stone, and other hard materials.

Product Overview

Professional Diamond Grinding Solution

This diamond grinding wheel is engineered for efficient material removal and high-performance surface preparation. Featuring a robust diamond matrix and segmented design, it delivers aggressive grinding capabilities while ensuring an extended operational lifespan. The wheel is optimized for use on concrete, stone, and masonry, incorporating cooling features to reduce heat buildup and maintain consistent performance.

Technical Specifications

Key Design Features

- Double row segment design
- Segmented diamond grit
- Integrated cooling holes
- Vibration reduction geometry
- Optimized dust extraction

Performance Metrics

1 Smooth

Finish Quality

1 High

Grinding Aggression

Compatible Materials

Concrete, Stone, Ceramic Tile, Vitrified Brick, Masonry

Compatibility

Tool Compatibility

Standard Angle Grinders
