

Diamond Grinding Wheel for Glass Edge Grinders

These diamond grinding wheels are compatible with domestic and imported glass linear edge grinding machines, including bevel edge models. They are used primarily for coarse grinding with king kong wheels, as well as subsequent fine grinding processes.

Product Overview

Professional Diamond Grinding Solutions

These diamond grinding wheels are engineered for high-performance edge processing on both domestic and imported linear and bevel edge grinding machines. Designed for coarse and fine grinding stages, these wheels deliver consistent material removal and surface quality for glass, crystal, and stone applications. Their durable construction ensures compatibility with rigorous industrial manufacturing environments.

Technical Specifications

Available Grit Sizes	120#, 600#
Standard Dimensions	150 mm (Diameter) x 16 mm (Ribbed) x 8 mm (Width)

Application

Compatible Equipment

- Linear edge grinding machines
- Bevel edge glass abnormality grinding machines

Suitable Materials

Optical Glass • Crystal Handicrafts • Furniture Stone

Product Range

Available Wheel Series

- King Kong Wheel
- Resin Wheel
- 10S Polishing Wheel
- BK Polishing Wheel
- BD Polishing Wheel
- 905 Series Polishing Wheel
