

Diamond Grinding Wheel for Textile Machinery

Precision diamond grinding wheel engineered for apparel and textile machinery. It features slots and holes for cooling and debris removal, ensuring a smooth grinding process.

Product Overview

Precision Diamond Grinding Technology

This precision diamond grinding wheel is specifically engineered for high-performance apparel and textile machinery. The design features a durable construction intended for extended service life and consistent grinding accuracy across demanding applications. Its innovative geometry, incorporating strategic slots and holes, facilitates superior cooling and efficient debris removal to ensure a clean finish on cutting tools.

Technical Specifications

Model ID	SM301
Primary Applications	Textile Machinery, Apparel Equipment, Tool Sharpening, Material Removal

Design Features

Cooling Mechanism

- Strategic slots for thermal management
- Engineered holes for debris evacuation

Operational Benefit

Extended Tool Life • High Consistency
