

Diamond Grinding Wheel for Tile Polishing

This diamond grinding wheel is designed for polishing tiles, including glazed, micro-crystal, and rustic varieties, when used with water cooling. It delivers both a long working life and the sharpness required to achieve a smooth surface.

Product Overview

Professional Tile Polishing Solution

This diamond fine grinding wheel is engineered specifically for wet grinding applications on various tile types, including glazed, micro-crystal, and rustic tiles. Designed for efficiency and durability, it features high-quality diamond abrasives that ensure long working life and superior sharpness. The wheel is optimized to achieve excellent surface smoothness, making it an essential tool for professional tile finishing.
