

Diamond Grinding Wheel

This diamond grinding wheel is designed for efficient material removal and surface preparation. It features a durable construction with a diamond-impregnated surface for long-lasting performance.

Product Overview

High-Efficiency Diamond Grinding Wheel

This diamond grinding wheel is engineered for efficient material removal and superior surface preparation. Featuring a robust, durable construction with a diamond-impregnated surface, it delivers long-lasting performance even under demanding conditions. The specialized patterned surface design promotes effective dust extraction and cooling, ensuring consistent operation while grinding concrete, stone, and other hard materials.

Technical Specifications

Compatible Materials	Concrete, Stone, Hard Materials
Mounting System	Central mounting plate with multi-bolt hole configuration

Performance Features

Performance Highlights

- Diamond-impregnated surface for extended lifespan
- Patterned surface for optimized dust removal
- Integrated cooling design for operational stability
- Secure multi-bolt attachment
