Product Overview

Professional Diamond Polishing Solutions

These diamond polishing pads are engineered for high-performance finishing on hard surfaces including stone, glass, ceramics, and concrete. Featuring durable, diamond-impregnated abrasive surfaces, they are designed to handle both detail work in tight corners and general surface polishing. Available in a range of grit sizes, these pads support the entire polishing process from coarse grinding to fine finishing.

Technical Specifications

Suitable Materials

- Stone
- Glass
- Ceramics
- Concrete

Available Grits

180#, 200#, 400#

Operating Features

Polishing Method

Wet Polishing • Hand Polishing

Equipment Compatibility

Angle grinders and polishers

Design & Construction

Bond Type

Resin bond

Backing

Flexible backing
