

Diamond Saw Blade for Concrete

This diamond saw blade is engineered for efficient cutting of concrete and masonry materials. It features laser-welded segments with optimized diamond concentration for extended blade life and aggressive cutting action.

Product Overview

High-Performance Cutting Solution

This diamond saw blade is engineered for efficient and precise cutting of concrete, reinforced concrete, and masonry materials. Featuring laser-welded segments with optimized diamond concentration, it ensures extended blade life and aggressive cutting action. It is designed for professional construction, demolition, and renovation applications, providing clean cuts with minimal chipping and vibration.

Technical Specifications

Compatible Tools

- Angle Grinders
- Circular Saws
- Concrete Saws

Suitable Materials

Concrete • Reinforced Concrete • Masonry

Cutting Conditions

Wet Cutting, Dry Cutting

Performance Features

Key Features

- Laser-welded segments
- Optimized diamond concentration
- Low vibration design
- Minimal chipping
