

# Diamond Saw Blade for Hard Materials

Diamond saw blades are designed for cutting hard materials such as stone, concrete, and tile. The blades have diamond-impregnated segments or rims for efficient cutting and durability.

## ADDITIONAL IMAGES

## Overview

### Professional Diamond Saw Blades

These diamond-impregnated saw blades are engineered for high-performance cutting across a variety of hard construction materials, including marble, granite, ceramic, asphalt, and concrete. Designed for durability and efficiency, the range includes specialized configurations such as segmented, continuous rim, and turbo blades to suit specific cutting applications. Essential for construction, renovation, and stone fabrication, these tools provide the precision required for industrial and professional projects.

## Technical Specifications

Diameter	125 mm
Thickness	2 mm
Segment Height	10 mm
Available Designs	Segmented, Continuous Rim, Turbo

## Applications

### Compatible Materials

- Marble
- Granite
- Ceramic
- Asphalt
- Concrete
