

Diamond Saw Blade for Stone Cutting

This diamond saw blade is designed for cutting stone and masonry materials. Its segmented rim contains diamond-impregnated segments for efficient and precise cutting.

Product Overview

Professional Diamond Saw Blade

This high-performance diamond saw blade is engineered for demanding stone and masonry cutting tasks. Featuring advanced laser-welded, diamond-impregnated segments, it ensures exceptional durability and heat resistance during operation. The robust steel core provides the stability required for precision work, while the specialized rim design facilitates rapid debris removal and effective cooling for an extended product lifespan.

Technical Specifications

Tool Compatibility

- Angle Grinders
- Circular Saws

Compatible Materials

Granite, Marble, Concrete, Masonry

Construction

Laser-welded segments on steel core

Rim Design

Segmented
