

Diamond Saw Blade for Stone Cutting

This diamond saw blade is designed for cutting stone edges and small-sized blocks. It features a segmented rim for efficient material removal and cooling.

Product Overview

Professional Stone Cutting Performance

This diamond saw blade is engineered specifically for cutting stone edges and small-sized blocks with high precision. It features a robust segmented rim design that facilitates efficient material removal and improved cooling during operation. Built for durability, this tool is an ideal choice for demanding stone fabrication tasks requiring consistent, clean cuts.
