

Diamond Saw Blade for Tile and Stone

This diamond saw blade is designed for cutting tile, ceramic, porcelain, and stone. The blade features a steel core and diamond-impregnated cutting edge for clean and precise cuts.

Product Overview

High-Performance Cutting Solution

The DG2009 is a professional-grade diamond saw blade engineered for precision cutting of tile, ceramic, porcelain, and stone. It features a robust steel core and a diamond-impregnated edge designed to minimize chipping while ensuring clean results. The inclusion of specialized cooling holes and a segmented rim design promotes heat dissipation and efficient debris removal, making it a reliable choice for extended use.

Technical Specifications

Cutting Compatibility

Wet Cutting • Dry Cutting

Model Identifier

DG2009

Suitable Materials

Tile, Ceramic, Porcelain, Stone

Design Features

Cooling Features

- Integrated cooling holes
- Heat dissipation design
- Warp reduction technology

Rim Configuration

Segmented Rim
