

Diamond Saw Blade

This diamond saw blade is designed for cutting hard materials. It features a segmented rim with diamond grit for abrasive cutting action.

Product Overview

Professional Diamond Saw Blade

This high-performance diamond saw blade is engineered for precision cutting in demanding industrial applications. Featuring a robust steel core and advanced diamond-impregnated segments, it ensures consistent material removal and long service life. Its segmented rim design is specifically optimized for cutting through hard materials like concrete, stone, and tile with minimal resistance.

Technical Specifications

Construction

Brazed/Laser-Welded Segments • Steel Core

Rim Configuration

Segmented

Compatible Materials

Concrete, Stone, Tile

Mounting Type

Central Bore
