

Diamond Saw Blades

High-precision diamond tipped saw blades are designed for cutting a variety of materials. These blades feature durable construction and precision-engineered diamond tips for clean and efficient cuts.

Overview

Professional Diamond Saw Blades

These high-precision diamond-tipped saw blades are engineered for demanding industrial and professional applications. Designed for durability and efficiency, they provide clean, accurate cuts across a variety of materials. The advanced construction minimizes vibration and noise, ensuring smooth operation and significantly extended tool life for consistent performance.

Technical Specifications

Blade Type	Fine-toothed diamond blade
Model Number	102160111
Origin	Yichang, China

Performance Features

Performance Metrics

100 % Cutting Precision	95 % Vibration Reduction
-----------------------------------	------------------------------------

Key Benefits	High Precision, Low Vibration, Noise Reduction, Extended Tool Life, Industrial Grade
