

Diamond Saw Blades

These diamond saw blades are designed for cutting a variety of materials including tile, concrete, and masonry. The blades are available in continuous rim, segmented, and turbo styles to suit different cutting requirements.

Product Overview

Professional Diamond Cutting Solutions

This comprehensive range of diamond saw blades is engineered to meet diverse cutting requirements across various construction materials. The collection features specialized designs including continuous rim, segmented, and turbo blades, each optimized for specific tasks ranging from precision tile work to heavy-duty concrete cutting. With sizes available from 105mm to 350mm, these tools ensure compatibility with a wide array of machinery and cutting depths.

Technical Specifications

Available Blade Types	Continuous Rim, Segmented, Continuous Rim Turbo, Segmented Rim Turbo, Spiral Turbo, Tuck Point
Size Range	105mm - 350mm

Model Details

Blade Model Catalog

Model ID	Type	Size Range
DT001	Continuous Rim	105mm-300mm
DT002	Segmented	105mm-350mm
DT003	Continuous Rim Turbo	105mm-350mm
DT004	Segmented Rim Turbo	105mm-350mm
DT005	Spiral Turbo	105mm-230mm
DT006	Tuck Point	105mm-230mm
