

# Diamond Saw Blades for Material Cutting

High-performance diamond saw blades are suitable for cutting concrete, stone, tile, and asphalt. The blades have laser-welded segments with high diamond concentration for long life and clean cuts.

## Product Overview

### High-Performance Diamond Saw Blades

These diamond saw blades are engineered for professional-grade cutting performance across a wide range of demanding materials, including concrete, stone, tile, and asphalt. Featuring laser-welded segments with a high concentration of diamond grit, they are designed to deliver fast, clean cuts while maintaining extended service life. These blades are available in various sizes and configurations to ensure compatibility with a broad spectrum of cutting equipment and applications.

## Technical Specifications

### Construction Features

- Laser-welded segments
- High diamond concentration
- Extended service life
- Fast, clean cutting capability

### Suitable Materials

Concrete, Stone, Tile, Asphalt

### Availability

Available in various sizes and specifications for diverse equipment
