

Diamond Saw Segments

Diamond segments are made for cutting hard materials like stone, concrete, and asphalt. The segments have industrial-grade diamonds in a metal bond matrix for effective cutting and a long lifespan.

Product Overview

Professional Diamond Saw Segments

These high-quality diamond segments are engineered for superior cutting performance on hard materials, including concrete, stone, and asphalt. Built with a durable metal bond matrix and embedded industrial-grade diamonds, they offer extended service life and efficient material removal. Designed for demanding industrial environments, these segments are an essential component for precision cutting and grinding applications.

Technical Specifications

Construction

- Durable metal bond matrix
- Embedded industrial-grade diamond particles
- High-performance design for material removal

Suitable Materials

Concrete, Stone, Asphalt

Industrial Usage

Primary Industries

Construction • Demolition • Stone Processing
