

Diamond Segment for Marble Cutting

This diamond segment is designed for cutting marble and other soft stones. It features a sharp cutting edge and is manufactured to European standards.

Product Overview

Professional Diamond Segments

These high-performance diamond segments are engineered for precision cutting of marble, granite, and various high-grade stones. Designed with advanced diamond formulas and European standards, they offer a reliable solution for cutting, grinding, and drilling applications. Our segments are developed through rigorous scientific research to ensure optimal cost-efficiency and durability for professional stone processing.

Key Features

Quality Standards

European Standard • Precision Engineered

Suitable Materials

Marble, Granite, Sandstone, Limestone, Slate, Andesite, Basalt, Concrete

Technical Specifications

Available Dimensions

Blade Diameter (mm)	Core Thickness (mm)	Segment Dimension (mm)	Segment Count
!300	1.8/2.2/2.4	40x3.0x12(15)	21/22
!350	1.8/2.2/2.4	40x3.2x12(15)	24/25
!400	2.2/2.4/2.8	40x3.4x12(13,15)	28
!500	2.8/3.0/3.2	40x4.2x12(13,15)	36
!600	3.0/3.6	40x4.6x12(13,15)	42
!800	4.5/5.0	40x6.0x12(15,20)	46
!1000	5.0	24x7.0/6.2x15(20)	70
!1200	5.5	24x7.4/6.6x15(20)	80
!1400	6.5	24x8.4/7.6x15(20)	92
!1600	7.2	24x9.2/8.4x15(20)	104/108
!2000	8.0	24x10.6/9.8x15(20)	128/132
!2500	9.0	24x11.5/10.5x15(20)	140
!3500	9.5	24x13.5/13.0/12.2x30	180

Customization

Other specifications and sizes are available upon request to meet specific project requirements.
