

# Diamond Sintered Saw Blade

This diamond sintered blade is suitable for dry or wet cutting. It has a maximum speed of 13900 RPM and complies with EN 13236 standards.

## Product Overview

### Professional Diamond Sintered Saw Blade

This high-performance diamond sintered saw blade is engineered for versatile cutting applications, including granite, marble, ceramic tiles, concrete, and asphalt. Designed for both dry and wet cutting, it features a robust composition of diamond grit, iron, and copper powders. With a focus on longevity and sharpness, this blade meets rigorous international standards, making it a reliable choice for professional tooling requirements.

## Technical Specifications

Maximum Speed	13900 RPM
Maximum Linear Speed	80 m/s
Dimensions	110 x 1.9 x 7.0 x 22.23H mm
Compliance Standards	ISO 9001, MPA, EN 13236

## Manufacturing & Composition

### Manufacturing Technology

- Cold pressed
- Hot pressed
- Brazed welded
- Laser welded

### Segment Composition

- Diamond grit
- Iron powder
- Copper powder

## Application & Compatibility

### Blade Types Available

Segment • Continuous rim • Turbo

Compatible Materials	Granite, Marble, Ceramic tiles, Concrete, Asphalt
----------------------	---

## Logistics

### Packaging Methods

- Color box
- Double blister
- Skin packing
- White box
