

# Diamond Wire Rope for Stone Quarry Cutting

This diamond wire saw is used for cutting granite, marble, reinforced concrete, steel, or metal structures. The string body contains high-quality diamond and cobalt powder with 40 beads per meter.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Diamond Wire Saw

This diamond wire saw is engineered for high-efficiency cutting in demanding environments, including stone quarries and construction sites. Utilizing premium diamond and cobalt powder components, it ensures superior cutting performance and durability. The construction features imported high-strength wire rope, reinforced with rubber and spring fixation for optimal flexibility and longevity.

## Technical Specifications

Bead Density	40 beads/m
Fixation Method	Rubber, Spring
Wire Rope Origin	Belgium

## Certifications

Certifications  
CE • ISO

## Applications

### Compatible Materials

- Granite
- Marble
- Reinforced Concrete
- Steel Structures
- Metal Structures
- Buildings
- Bridges
- Shipwrecks
- Cables
