

Diamond Wire Saw Beads for Stone Quarrying

Electroplated diamond wire saw beads are used for marble quarrying and concrete cutting. The beads provide fast cutting, energy saving, and long-lasting performance.

Product Overview

High-Performance Diamond Wire Saw Beads

These electroplated diamond wire saw beads are engineered for demanding applications including marble quarrying and concrete cutting. Designed for efficiency and durability, they offer a reliable solution for mining machinery and rock drilling operations. Their advanced construction ensures fast cutting speeds while maintaining energy efficiency and environmental standards.

Technical Specifications

Available Diameters

- 8.5mm
- 10.5mm
- 11.0mm

Primary Applications

Marble Quarrying, Concrete Cutting, Mining Machinery, Rock Drilling

Manufacturing Process

Electroplated

Performance Features

Key Benefits

Fast Cutting • Long-Lasting • Energy Saving • Environmentally Friendly
