

Diamond Wire Saw for Stone and Concrete Cutting

Diamond wire saws are cutting tools utilizing a steel cable embedded with diamond beads. They are suitable for cutting concrete, granite, marble, and other materials in quarrying, construction, and demolition.

Product Overview

Professional Diamond Wire Saw

This diamond wire saw is a high-performance cutting tool designed for demanding applications in construction, quarrying, and demolition. It features a robust steel cable embedded with high-quality diamond beads, ensuring both superior cutting strength and necessary flexibility. Engineered for versatility, it provides clean and efficient cuts across a wide range of hard materials.

Technical Specifications

Primary Applications

- Quarrying
- Construction
- Demolition

Design Features

Steel Cable Core • Diamond Bead Cutting Action • High Flexibility

Suitable Materials

Concrete, Granite, Marble
