

Diamond Wire Saw for Stone and Concrete Cutting

This wire saw is designed for cutting hard materials like stone and concrete. It features diamond-impregnated beads for efficient and clean cuts, suitable for quarrying, construction, and demolition applications.

Product Overview

Professional Diamond Wire Saw

This high-precision diamond wire saw is engineered for demanding applications in stone cutting, construction, and structural demolition. It features diamond-impregnated beads that ensure efficient, clean cuts while maintaining a smooth surface finish. Designed to handle hard materials like reinforced concrete, the wire minimizes material waste to improve project economy.

Technical Specifications

Performance Features

- Diamond-impregnated bead technology
- High-precision cutting performance
- Smooth surface finish
- Minimized material wastage

Availability

Variable Diameters • Customizable Lengths

Cutting Capabilities

Stone Cutting, Concrete, Reinforced Concrete, Quarrying, Demolition
