

Diaphragm Gas Meter with Mechanical Counter

This gas meter utilizes a diaphragm for accurate measurement of gas consumption. The integrated mechanical counter displays the total volume of gas that has passed through the meter.

Product Overview

Precision Gas Measurement

This G1.6 diaphragm gas meter is engineered for reliable and accurate measurement of gas consumption in residential and light commercial settings. It utilizes a robust mechanical counter to display the total volume of gas passed, ensuring consistent performance. Designed for efficiency, it supports a wide flow range, making it a dependable solution for monitoring gas usage.

Technical Specifications

Maximum Flow Rate (Qmax)

2.5 m³/h

Qmax

Minimum Flow Rate (Qmin)

0.016 m³/h

Qmin

Meter Classification

G1.6 • Diaphragm Type

Display Mechanism

Mechanical Counter

Application

Recommended Use

Residential, Light Commercial
