

# Die-Cut Adhesive Stickers and Washers

Die-cut adhesive stickers are available in various precise shapes and are easy to remove from their backing. Die-cut adhesive washers feature a central hole and strong adhesive for secure attachment in automotive, electronics, and industrial applications.

## ADDITIONAL IMAGES

## Product Overview

### Precision Die-Cut Solutions

These die-cut adhesive stickers and washers are engineered for reliable fixation and strong holding power across a wide spectrum of industrial applications. Manufactured from versatile materials including acrylic, PE foam, and EVA foam, they provide durable performance for assembly and mounting needs. Designed for precision and ease of use, these components are suitable for sectors ranging from automotive to general electronics.

## Material & Composition

### Available Materials

Acrylic, PE Foam, EVA Foam

## Performance Features

### Key Features

- High-strength adhesive backing
- Excellent fixation capabilities
- Durable holding power
- Precision die-cut shapes

## Applications

### Industry Applications

Automotive • Electronics • General Industrial • Assembly
