Product Overview

Versatile Die-Cut Adhesive Solutions

These custom die-cut adhesive washers and shapes are engineered for reliable fixation and strong holding power across a wide range of industrial applications. Manufactured from high-quality materials including acrylic, PE foam, and EVA foam, they provide excellent bonding performance. Designed to meet the needs of automotive, electronics, and general manufacturing sectors, these components offer secure attachment and vibration dampening.

Technical Details

Key Features

- Good fixation
- Strong holding power
- Vibration dampening
- Versatile application range

Available Materials

Acrylic, PE Foam, EVA Foam

Applications

Suitable Industries

Automotive • Electronics • General Industrial
