

Diesel and Light Oil Transfer Pump with Meter

Self-priming electric transfer pump designed for diesel and light oil applications. It features a mechanical meter for accurate dispensing and a portable frame for easy transport. Suitable for agricultural, construction, and industrial use, it includes a dispensing nozzle, suction and delivery hoses, and an integrated filter.

Product Overview

Professional Transfer Solution

This self-priming electric transfer pump is specifically engineered for the reliable handling of diesel and light oils. Designed for versatility, it features a heavy-duty construction that ensures durability in demanding agricultural, construction, and industrial environments. The unit comes fully equipped with a mechanical meter for precise monitoring, a nozzle, and integrated hoses for immediate operational readiness.

Technical Specifications

Pump Type	Self-priming electric transfer pump
Compatible Fluids	Diesel, Light Oil

Equipment Included

Package Contents

- Mechanical flow meter
- Dispensing nozzle
- Suction hose
- Delivery hose
- Integrated filter
- Portable transport frame

Industry Applications

Suitable Industries

Agriculture • Construction • Industrial
