

Diesel Concrete Mixer with Hydraulic Hopper

Diesel concrete mixer equipped with a hydraulic tipping hopper. It efficiently mixes two bags of cement in a single operation.

Overview

Robust Diesel Concrete Mixer

This robust diesel-powered concrete mixer features a hydraulic tipping hopper designed for high-efficiency material loading on construction sites. Engineered for mobility and reliable performance, it includes a water-cooled single-cylinder engine and a high-capacity drum. It is an ideal solution for civil engineering projects requiring consistent concrete production and independent operation.

Performance Metrics

Production Capacity

14 m3/h

Max Capacity

350 L

Discharge Volume

13 r.p.m

Drum Speed

Batch Capacity

2 bags of 50kg cement

Technical Specifications

Starting System

Battery Starter

Engine Power

15 HP

Engine Type

Single cylinder, water-cooled with radiator

Water Tank Capacity

110 L

Dimensions and Mobility

Dimensions (L x W x H)

3250 x 2240 x 3200 mm

Machine Weight

1790 kg

Max Towing Speed

20 km/h

Compliance

HS Code

847431000
