Overview

Professional Diesel Power Generation

This diesel-powered generator set is engineered for reliability and performance in industrial, construction, and commercial applications. Featuring a robust, silent-type enclosure, the unit is designed for stable operation and efficient power delivery in diverse environments such as hospitals, hotels, and building sites. Equipped with an advanced integrated controller, it provides precise monitoring of critical electrical and engine parameters to ensure operational safety.

Technical Specifications

Rated Power Output

100 KVA

Power Capacity

Operating Frequency

60 Hz

Fuel Type

Diesel

Features & Safety

Key Operational Benefits

- Silent operation enclosure
- High power margin for stable output
- Advanced controller for voltage and frequency monitoring
- Integrated emergency stop functionality

Compliance

International Standards • Local Regulatory Compliant
