

Diesel Engine Common Rail Injector Nozzle

This diesel engine common rail injector nozzle is manufactured to exacting standards. It provides optimal fuel atomization for improved combustion efficiency in a variety of diesel engine applications.

Overview

High-Precision Common Rail Injector Nozzle

This diesel engine common rail injector nozzle is engineered for high-precision fuel atomization and optimal combustion efficiency. Constructed from durable steel, it is designed to withstand extreme pressures and temperatures while ensuring reliable performance across multi-cylinder diesel applications. The precision spray pattern helps improve fuel economy and reduce emissions, meeting rigorous international quality standards.

Key Metrics

Physical Specifications

0.04 kg

Unit Weight

6 Months

Warranty Period

Technical Specifications

Body Material	Steel
Cylinder Configuration	Multi-cylinder
Carburettor Type	Downdraft
Fuel Type	Diesel
Stroke	Standard

Compliance & Quality

Certifications	ISO9001, TS16949, ISO 9001:2008, SGS
----------------	--------------------------------------

Product Identification

HS Code	84099199
---------	----------
