Overview

Versatile Diesel Centrifugal Pump

The CB Series diesel centrifugal pump is engineered for high-volume water transfer, making it an ideal choice for farmland irrigation, nursery maintenance, and tea garden operations. Featuring a robust diesel engine and a portable frame design, this pump combines reliability with ease of movement. It is available in various configurations to suit specific operational requirements, including belt or direct drive options.

Technical Specifications

Frame Configuration

Fixed Frame • Movable Frame

Available Types

- Hand Lift Type
- Normal Type

Pump Size Range

2 inch to 6 inch

Drive Mechanism

Diesel Engine, Belt Drive, Direct Connection

Features & Applications

Key Advantages

- Lightweight design
- Simple operation
- Easy movement/portability
- Durable construction

Primary Applications

Farmland Irrigation, Nursery, Tea Garden, Dewatering, Construction
