Overview

High-Performance Diesel Engine

This robust diesel engine is specifically engineered for power generation applications, offering reliable operation in demanding environments. It features a durable construction designed for a long service life and an optimized combustion system that ensures efficient fuel consumption. Suitable for a wide range of industrial and agricultural needs, this engine provides dependable power where it is needed most.

Technical Specifications

Primary Application

Power Generation • Industrial • Agricultural

Available Models

ZS1125, ZS1130

Manufacturing Origin

Changzhou, China
