

Diesel Engine for Power Generation

This diesel engine is designed for power generation. It features a robust construction suitable for various applications requiring reliable power.

ADDITIONAL IMAGES

Overview

Reliable Diesel Power Generation

This diesel engine is engineered for robust performance in demanding power generation applications. With a power output range of 4.2HP to 10HP, it offers a versatile and efficient solution for industrial equipment, including generators and water pumps. The unit features a compact, durable design that ensures stable operation and longevity in various field environments.

Technical Specifications

Power Output Range

4.2 HP

Minimum Power

10 HP

Maximum Power

Model Designation

186FA

Engine Type

Diesel

Applications

Primary Applications

- Power Generation
- Water Pumps
- Industrial Equipment

Features

Key Features

Compact Design, Easy Start Mechanism, Stable Operation, Efficient Combustion
